SUMMARY

Capacity Planning & Workforce Management Analyst with 3 years of experience in real-time operations, workforce analytics, KPI management, capacity monitoring, reporting automation, and business intelligence. Experienced in analyzing demand, staffing, service levels, AHT, occupancy, utilization, adherence, and shrinkage to identify capacity gaps and support operational decisions. Skilled in SQL, Advanced Excel, Power Query, Power BI, AWS QuickSight, Tableau, and Grafana for data analysis, dashboarding, reporting, and performance monitoring. Strong experience in root-cause analysis, process improvement, stakeholder collaboration, and automating recurring operational reports.

TECHNICAL SKILLS

Capacity Planning & WFM: Capacity Planning, Workforce Management, Real-Time Management, Staffing Analysis, Demand & Volume Analysis, Intraday Management, Schedule Adherence, Occupancy, Utilization, Shrinkage, AHT, SLA, ASA, Abandonment, Productivity Analysis.

Data & Business Analytics: Data Analysis, Data Profiling, Data Validation, Data Mining, Trend Analysis, Root Cause Analysis, KPI Analysis, Business Intelligence.

BI & Visualization: Power BI, AWS QuickSight, Tableau, Grafana, Dashboard Development, Operational Reporting, KPI Scorecards.

Data & Programming: MySQL, Python, Power Query, Advanced Excel, Excel Macros, Excel Formulas, Data Transformation.

Business Analysis: Requirements Gathering, Business Process Mapping, Data Flow Diagrams, UAT, Stakeholder Management, Process Improvement.

Automation: Excel VBA/Macros, Power Query, Automated Reporting, Dashboard Automation, Reporting Workflows

Machine Learning: Machine Learning Concepts, Predictive Modeling, Data Science.

PROFESSIONAL EXPERIENCE

Sutherland Global Services – Chennai

Real Time Analyst (Data & Workforce Management) | Mar 2024 – Feb 2025 | Oct 2025 – Present

- Performed real-time workforce and capacity monitoring across voice and chat operations, analyzing staffing levels, incoming volume, AHT, SLA, occupancy, utilization, adherence, and shrinkage to identify capacity gaps and operational risks.
- Monitored real-time queue performance and agent availability against expected capacity, proactively identifying staffing variances and recommending operational adjustments to support service-level targets.
- Analyzed historical and interval-level operational data including volume, AHT, staffing, and productivity trends to support workforce planning, staffing decisions, and capacity requirements.
- Conducted deep-dive Root Cause Analysis (RCA) for SLA breaches, staffing gaps, productivity deviations, and performance trends, providing actionable insights to operations and leadership.
- Tracked real-time adherence and agent state utilization across multiple queues, identifying deviations from planned staffing and escalating capacity risks to operations stakeholders.
- Developed and maintained operational dashboards and reports using AWS QuickSight, Power BI, Grafana, and Advanced Excel to track KPIs and provide actionable business insights.
- Automated recurring hourly and daily WFM reports and executive scorecards using Advanced Excel, Power Query, macros, and automated reporting workflows, improving reporting efficiency and consistency.
- Analyzed trends in incoming contact patterns, staffing, AHT, and service-level performance to identify operational gaps and support short-term workforce decisions.
- Collaborated with Operations, Team Managers, and cross-functional stakeholders to communicate KPI trends, capacity gaps, process issues, and recommended corrective actions.
- Supported process improvement initiatives by identifying reporting and operational gaps and developing data-driven mechanisms to improve visibility, accuracy, and decision-making.

Cognizant Technology Solutions – Coimbatore

Process Executive - Data | July 2022 – July 2023

- Analyzed large and complex operational and healthcare datasets to identify data discrepancies, assess business rules, and support accurate process decisions.
- Conducted detailed Root Cause Analysis on complex exceptions and claim denials, identifying recurring process and data issues and documenting corrective actions.
- Performed data validation and investigation using structured datasets and standardized coding information to ensure accuracy and compliance with business requirements.
- Developed process and data-flow documentation to communicate issues, requirements, and resolution approaches to cross-functional stakeholders.
- Collaborated with internal and external stakeholders to identify data delivery issues, resolve exceptions, and improve overall process efficiency.

ADDITIONAL INFORMATION

- **Education:** Erode Arts and science College | Erode | B.COM (PA) | 2018 - 2021
- **Certifications:**
- Data Science and Data Analytics | KGiSL Microcollege | 2025
- Databases and SQL for Data Science with Python | Coursera (IBM) | 2025
- Preparing Data for Analysis with Microsoft Excel | Coursera (Microsoft) | 2025

PROJECTS

ADVANCED SQL – IMDb DATABASE ANALYTICS | SQL

GitHub Repository

- Analyzed a normalized IMDb-style relational database containing movie, genre, ratings, actor, director, and role-mapping datasets to derive actionable business insights.
- Developed 25+ analytical SQL queries using complex JOINS, CTEs, subqueries, aggregate functions, and window functions across multiple related tables.
- Applied filtering, grouping, NULL checks, pattern matching, and data analysis techniques to investigate movie performance, ratings, genres, actors, directors, and production trends.
- Implemented stored procedures using procedural SQL and documented query logic to improve analytical workflow and reusability.
- Presented analytical findings through a business-oriented report and presentation, translating SQL outputs into meaningful insights.
